

BELL DEMONSTRATES EXCELLENCE IN REFURBISHMENT

Bell is committed to ensuring your aircraft meets your mission specific requirements. Whether you are looking for customization, repair and overhaul, or maintenance, our team in Piney Flats, Tennessee has the ability to provide solutions tailored to your specifications.

The transition of an aircraft that is 20+ years old to a completely refurbished Bell 407 highlights our capabilities.

In November of last year (2019), work began on refurbishing a Bell 407 (serial number 53157) that was originally manufactured in May of 1997. The aircraft had been used by Bell, primarily in Piney Flats, TN for demonstrations, customer transport and for

certifications of new Aeronautical Accessories branded products.

The ship was completely disassembled and a custom paint option was designed. An entirely new interior was then designed to complement the fresh paint colors. Additionally, several Aeronautical Accessories products were included in the aircraft – including Polycarbonate Windshields, High Visibility Windows and Doors, Interior Plastics, and the new 407 G1000 NXi Retrofit Kit/ Glass Cockpit.

Some images reflecting our work-in-progress are below, and our total transformation time from start to finish was less than 3 months.
